

Cedric Errol P. Oporto

Full-Stack Developer | AI-Integrated Applications

Ibo, Lapu-Lapu City, Cebu • 0991 427 5093 • cedricoportost@gmail.com • github.com/cedecj042

PROFESSIONAL SUMMARY

Full-Stack Developer with 1 year hands-on experience building and maintaining production web and mobile applications across multiple client projects. Strong in PHP/Laravel, React, TypeScript, Inertia.js, React Native, MySQL, REST APIs, Docker, and Git-based workflows. Combines software engineering with UI/UX design and applied AI experience, with ownership across debugging, refactoring, client communication, code review, deployment, and team coordination.

PROFESSIONAL EXPERIENCE

MAC CORMACK

REMOTE

Full-Stack & Mobile Developer | Full-time

May 2025 - Sep 2026

- Contributed to multiple production web and mobile applications using Laravel, Inertia.js, React/TypeScript, and React Native, adapting quickly between different client codebases and requirements.
- Built and integrated REST APIs between Laravel backends and web/mobile clients, working across database design, backend business logic, data flow, and responsive interfaces.
- Diagnosed and resolved production issues across web and mobile applications, refactored legacy or existing code, and delivered new features and improvements across active customer projects.
- Worked in Docker-based development environments and Git/GitHub pull-request workflows while using Linear and Notion for task tracking, requirements, documentation, and project coordination.
- Used AI-assisted development tools such as Claude to investigate unfamiliar codebases, plan implementations, refactor code, debug issues, and review changes while independently validating solutions.
- Led a small development team, reviewed pull requests, communicated directly with clients, coordinated priorities and releases, and provided regular progress updates.

HIPE JAPAN INC.

CEBU CITY

Full-Stack Developer | Intern

Feb 2025 - May 2025

- Developed and refactored HRIS features using Laravel, Inertia.js, React, and TypeScript within an existing production-oriented codebase.
- Traced and fixed frontend and backend bugs, cleaned up existing implementations, and delivered small feature improvements to strengthen maintainability and usability.
- Translated Figma designs into reusable interface components and refined page layouts while balancing development requirements with UI/UX considerations.

GOODAPPS INC.

CEBU CITY

UI/UX Designer | Full-time

Sep 2019 - Feb 2021

- Gathered user and business requirements and translated them into user-centered specifications, wireframes, interface concepts, and structured design solutions.
- Created mockups, UI assets, and visual design materials using Adobe XD and Adobe Illustrator, maintaining consistency across product and marketing deliverables.
- Supported UX evaluation and iterative design improvement by reviewing usability, information presentation, interaction flow, and visual clarity.

- Produced marketing visuals and digital design assets, building an early foundation in visual communication that continues to inform frontend and product-development decisions.

SELECTED PROJECTS

- **TopIT | Undergraduate Thesis**
 - Built a large two-service thesis application consisting of a Laravel/React web platform and a Python/FastAPI service for AI and document-processing workflows.
 - Integrated LLM-based question generation, PDF processing, Retrieval-Augmented Generation (RAG), and ChromaDB-backed retrieval for contextual assessment generation.
 - Implemented 2PL Item Response Theory with MAP estimation to model student ability and item parameters for adaptive assessment behavior.
 - Used Docker/Laravel Sail and MySQL to support a reproducible development environment and application data layer.
- **Sidequest Pickleball Court | Freelance** *sidequestpickleball.com*
 - Built and deployed a production court-booking platform using Laravel, Inertia.js, React, and MySQL.
 - Containerized and deployed the application on DigitalOcean with Cloudflare for DNS, SSL.
- **Readingful | Production Client Project** *readingful.com*
 - Contributed to a production learning platform built with Laravel, Inertia.js, React, and TypeScript, delivering features and resolving issues across student and administrative experiences.
 - Worked on UI behavior, navigation, asset-loading and preload flows, responsive interfaces, and production bug fixes while supporting compatibility across different browser environments.
 - Reviewed code, coordinated releases, and communicated with the client on requirements, implementation progress, and issue resolution.

EDUCATION

UNIVERSITY OF SAN JOSE-RECOLETOS (USJ-R)

CEBU CITY

BS Computer Science, Major in AI & Web Development / Cum Laude

Aug 2021 - May 2025

TECHNICAL SKILLS

- Backend: PHP, Laravel, Python, Django, FastAPI, C#, .NET, MySQL, Docker
- Frontend & Mobile: React, TypeScript, Inertia.js, Angular, React Native, HTML/CSS, Bootstrap
- AI: LangChain, ChromaDB, RAG, DistilBERT

AWARDS & RECOGNITION

- IPBL Smart Drone Vision Challenge
- SpeakUp - 2nd Runner-Up Hackathon
- SFTECH UI/UX - 2nd Place
